Week 09 Progress Report

Details

- **Name of Student:** Tirthak Girish Likhar
- **PRN: 22070521041**
- **Name of Industry:** SS Infotech Pvt. Ltd.
- **Reporting Week: (02/03/2026 to 06/02/2026)**
- **Institute Mentor Name:** Dr. Shreyas Hole
- **Industry Mentor Name:** Mr. Viraj Patle

Overview of a Week

- Week 9 was centred around my attendance at the Nullcon Goa 2026 Cybersecurity Conference, held from 28th February to 4th March 2026 at BITS Goa. Nullcon is one of India's leading security events, bringing together researchers, practitioners, and offensive security professionals from across the industry

- The week involved attending multiple technical sessions covering a wide range of topics including OT/ICS security, Windows internals, evasion techniques, and modern adversarial tradecraft. Beyond the technical talks, the conference also provided significant opportunities for networking with experienced security professionals and understanding real-world SOC and red team workflows

Key Accomplishments

- Attended Nullcon Goa 2026 (28th February – 4th March 2026) at BITS Goa, one of India's premier cybersecurity conferences.
- Attended and engaged with multiple technical talks, including:
    - Cruise Control – Karan Sajnani & Jaden Furtado: A live attack demonstration inside a 3D ship simulation, showcasing a step-by-step compromise chain targeting maritime vessel systems. The session made complex OT/ICS attack concepts highly tangible and memorable.
    - Phantom Code – Varshith Jakkaraju: A technically detailed session covering undocumented changes in Windows 11 25H2, self-deletion techniques, POSIX-based stealth injection, and modern anti-detection and evasion methods. Delivered in a clear and engaging manner despite the depth of content.

- Gained exposure to real-world SOC workflows, modern offensive techniques, and the broader security community through networking with industry professionals.

Tools Used – Week 8

- **Nullcon Goa 2026 Conference – Primary learning environment for the week**

- **Conference sessions and speaker presentations – For exposure to offensive security, evasion techniques, and OT/ICS attack scenarios**

- **Personal notes / documentation – For recording key takeaways from sessions**

Conclusion of Week 6 :-

Week 9, while a departure from hands-on lab work, provided significant real-world learning through attendance at Nullcon Goa 2026. The technical sessions on maritime vessel attacks and Windows evasion techniques offered perspectives that go well beyond what structured courses typically cover. The exposure to industry practitioners and cutting-edge offensive research has strengthened my understanding of the threat landscape that SOC analysts are expected to defend against.

The insights gained from Nullcon, particularly around detection gaps, adversarial thinking, and real-world SOC workflows, will directly inform the practical work ahead in the coming weeks of the internship.

I didn't expect my **first cybersecurity conference**, NULLCON GOA 2026, to impact me the way it did, but walking out of it, one thing became very clear to me:

I have a lot to learn, **a lot to study**, **and I'm more motivated than ever to level up**.

The experience genuinely humbled me, but it also fired me up to push harder.

One of the sessions that really stood out was **Cruise Control** by Karan Sajnani and Jaden Furtado. They ran a live demo inside a 3D ship simulation and showed exactly how attackers can compromise maritime vessels in a step-by-step chain. Watching an attack scenario unfold in real time made the entire concept far more practical and memorable.

Another session I enjoyed was **Phantom Code** by Varshith Jakkaraju. It covered undocumented changes in Windows 11 25H2, self-deletion methods, POSIX-based stealth injection, and modern evasion techniques. It was technical but delivered in a very clear and engaging way.

The highlight of the event for me was meeting Harshit Joshi **sir**. I've learned a lot from his YouTube content, and getting to talk to him in person was something I genuinely appreciated. Thank you, sir, for the advice, the perspective, and the encouragement. Conversations like that stay with you long after the conference ends.

I also want to thank all the sponsors:- Wiz, DarkDive, Altered Security, Arete, SentinelOne, CrowdStrike, Adobe, Lineaje Inc, Intuit, ColorTokens Inc., Recorded Future, Tenable, CompTIA, Amazon Web Services (AWS), Cyble, Binary Gecko, CloudSEK, Payatu, SANS Institute, TechDefence, Zoho and everyone else who contributed. Your support made the conference a meaningful experience for attendees like me.

NULLCON made me realize how much there is to explore in cybersecurity, and it pushed me to study harder, stay consistent, and keep improving. I'm excited for the path ahead.

NULLCON made me realize how much there is to explore in cybersecurity, and it pushed me to study harder, stay consistent, and keep improving. I'm excited for the path ahead.

Tirthak, this is what growth looks like.

We are glad your first Nullcon left you motivated and hungry to learn more. Keep building, keep questioning, and we hope to see you back in Feb 2027, leveling up even further.
